

LUDWIG-
MAXIMILIANS-
UNIVERSITÄT
MÜNCHEN

DEPARTMENT PSYCHOLOGIE
KLINISCHE NEUROPSYCHOLOGIE

The department of ***Clinical Neuropsychology*** (Prof. Dr. Thomas Schenk) at Ludwig-Maximilian University in Munich is looking for a student research assistant (female/male).

Starting time is October 1st for a duration of 6 months, 6 hours during the week.

We are looking for a student research assistant with very good programming skills (especially Matlab) who is motivated and interested in neuropsychological research. Our main research interests include visual perception, attention and visuo-motor skills. Currently, we investigate the relationship between visual perception, attention and action, and we develop training regimens in order to treat patients with neglect (attention deficits) and hemianopsia (visual deficits).

Tasks:

-Experimental Programming, especially with Matlab

Requirements:

- programming knowledge with Matlab
- autonomous and reliable work
- interest in neuropsychological research

We offer:

Introduce you into neuropsychological research and provide necessary trainings for scientific work.

Please send your application via e-mail to
