

Guest Lecture

Who do we cite? What can co-citation analysis tell us about research practices in education?

Prof. Dr. Heisawn Jeong
Hallym University, South Korea

Friday, December 5th, 2014, 12-14
Leopoldstr. 13, room 1305

The talk will examine a preliminary outcome from an ongoing research about a bibliometric analysis of educational research. Analysis of co-citation patterns using Web of Science and SCOPUS publications reveals research clusters in educational research. The talk will present these clusters and examine a subset of them in more detail in order to make sense of the bibliometrically coupled clusters. Implication of the research will be discussed in terms of what the outcome can tell us about research practices in education.
